Family leaders are protagonists in supporting entrepreneurship in family businesses and business families. They are institutional entrepreneurs with the commitment to facilitate the renewal of the business model and governance structures which is essential for sustainable family business success and prosperity for all stakeholders. The central theme of 14th EIASM Family Firm Management Research Workshop is ‘*Entrepreneurial Families across Generations*’, but we welcome research papers and case studies with a focus on wide range of thematic topics addressing the principles and practices of entrepreneurialism, not restricted to:

- Entrepreneurial family firms across stages of development and generations
- Entrepreneurial cooperation between and within families in business
- Family leadership and sustainable entrepreneurship
- Family values and family business entrepreneurship
- Family dynasties and governance
- Innovation and family business entrepreneurship

In addition to featuring state of the art research papers which add value to the development of the family business research field, the workshop will offer keynotes and a policy forum. An optional cultural tour of Cyprus will follow after the workshop.

Keynote Speakers:

Carole Howorth, Professor of Entrepreneurship and Family Business, University of Bradford School of Management, UK
Lloyd Steier, Professor of Strategic Management & Organization, Distinguished Chair, Entrepreneurship & Family Enterprise, University of Alberta School of Business, Canada
